Wilson's phalarope: p 151.

Wilson's Phalarope *Steganopus tricolor* (Viellot 1819), Vagrant (4)
25/9/1983 Manawatu Estuary, Manawatu

J.L. and M. Moore found a peculiar wader resembling a Lesser Yellowlegs at the Manawatu estuary in September 1983 (Moore & Moore 1984). A literature study indicated that the bird could only be a Wilson's Phalarope. It stayed until the 29th March. Later that year two were found at Lake Ellesmere, with one staying until April 1984.
